PROFESSIONAL SUMMARY

Computer Science & Engineering graduate (2026, 9.6 CGPA) specializing in Data Science & AI. Skilled in Python, Machine Learning, NLP and Generative AI, with strong foundations in DSA, OOP, DBMS, and Software Engineering. Experienced in building end-to-end AI/ML projects using LLM technologies including LangGraph, GPT, and Gemini APIs. Seeking an entry-level AI/ML or Software Engineering role to apply these skills to real-world engineering challenges.

EDUCATION

Bachelor of Technology(CSE–Specialization in Data Science and AI with IBM)

Integral University, Lucknow

2026

CGPA: 9.60

TECHNICAL SKILLS

Languages: Python, C

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Databases & Visualization: MySQL, Power BI, Tableau

Machine Learning: Scikit-learn, PyTorch, CNN, YOLO

Cloud & Tools: AWS, Git, GitHub

Coding Profile: LeetCode and GFG – 200+ problems solved , HackerRank – 5 star SQL

INTERNSHIP

Data Science Intern

EtrainIndia, in collaboration with IBM

Jun–Jul 2025

Hybrid

- Completed IBM's Python for Data Science certification program with hands-on data analysis exercises.
- Applied Python and data science workflows to real datasets, strengthening core DS fundamentals.

ML Project Intern – Competitor Strategy Tracker

Infosys Springboard

Feb 2025 – Apr 2025

India

- Built data pipelines (Python, BeautifulSoup) to scrape and process e-commerce data.
- Developed ML models for sentiment analysis and sales forecasting, following SDLC practices end-to-end .

AI Intern

Edunet Foundation, IBM SkillsBuild × AICTE

Nov–Dec 2024

India

- Built an ML classifier to predict employee burnout risk from workplace data.
- Applied data visualization and feature engineering to improve model accuracy and insights.

PROJECTS

AI-Based Knee Osteoarthritis Detection

Python, PyTorch, CNN, YOLO

Final Year Project

- Built a 5-class (KL Grade 0–4) knee OA severity classifier using an ensemble of EfficientNet-B5, EfficientNet-V2-S, and DenseNet-201 with Grad-CAM explainability
- Built a full-stack system (Flutter frontend, FastAPI backend) with automated PDF report generation for clinical use

Real-Time Collaborative Text Editor

Python, FastAPI, WebSockets, React

Personal Project

- Built a Google Docs-style collaborative editor enabling multiple users to edit the same document simultaneously via WebSocket-based real-time sync
- Designed backend architecture with a connection manager for live user presence, cursor tracking, and broadcast updates across sessions .

Farmer Voice Assistant

Python, Streamlit, REST APIs

Personal Project

- Built a Streamlit app delivering voice-based (TTS) farming guidance on weather, fertilizers, and market prices, with multilingual output via Deep Translator.
- Designed an emoji-driven, low-literacy-friendly UI for accessibility in rural use cases.

CERTIFICATIONS & TRAINING

ISRO – AI/ML Course | IIT BHU – Data Analytics in Python (A++) | IBM – AI Analyst, Python for Data Science, Data Science & Artificial Intelligence | AWS Educate – ML Foundations | Udacity – Generative AI with AWS | GenAI Study Jam (2023, 2024) - GDGC, Integral University : 30-day GenAI program; Top 80 recognition | Led By Accelerator – Led By Foundation | SheFi Scholar – SheFi | McKinsey Forward Program – McKinsey & Company
